REPORT TO CITY COUNCIL

DATE: SEPTEMBER 14, 2011

TO: HONORABLE MAYOR AND MEMBERS OF THE CITY COUNCIL

FROM: GREG RAMIREZ, CITY MANAGER

BY: AMIR HAMIDZADEH, BUILDING OFFICIAL

SUBJECT: CONTINUATION OF THE ENERGY EFFICIENCY INCENTIVE

PROGRAM REGARDING THE REDUCTION OF PERMIT FEES FOR THE INSTALLATION OF SOLAR PANELS AND ENERGY EFFICIENT

WINDOW REPLACEMENTS

In September 2010, as part of the ongoing effort to meet the City Council's goal of becoming a "Green City" and promoting energy efficiency in the City of Agoura Hills, the City Council adopted an Energy Efficiency Incentive Program (Resolution No. 10-1601) to reduce permit fees for the installation of solar panels, as well as energy efficient window replacements.

At the time of adoption, it was anticipated that the reduction in permit fees would increase the installation and usage of energy efficient alternatives and, ultimately, result in energy and cost savings for residential/commercial property owners in the community. Following is a report on the success of the program in 2010 and a request to authorize the continuation of the Energy Efficiency Incentive Program.

A countywide survey of municipalities in Los Angeles County was performed earlier this year regarding permit costs for the installation of an average solar system. Based on this study, it was estimated that an average permit cost for a commercial 131 kilowatt photovoltaic system varied significantly between municipalities from as high as \$46,616 to as low as "no cost." By adopting the Energy Efficiency Incentive Program, and reducing the fixed fee, property owners have experienced a significant savings in permit fees.

In addition to solar panels, window replacements are also another energy efficient solution. For the past several years, the California Energy Code has required that any windows that are replaced must be upgraded to dual-pane energy efficient windows. In recent years, due to the location of our jurisdiction in the Very High Fire Severity Zone (VHFSZ), another criteria has been added that requires the windows for new constructions be of 20-minute fire rating, or glass blocks, or that one of the window panes be tempered glass.

Due to the cost of these requirements, in addition to the plan review and permit requirements and fees, many window replacements had occurred without property owners obtaining the proper permit(s). The Energy Efficiency Incentive Program not only allows property owners to meet

current code compliance and ensure they are properly permitted, in the event of a fire or property transfer, but also creates a safer and more energy efficient environment in our community.

The continuation of this program was carefully considered by staff. Since the implementation of the program on September 22, 2010, forty-two (42) permits have been issued. The breakdowns of the number of residential/commercial permits, along with the permit fees collected by the City, are as follows:

Start Date	End Date	Number of Residential Permits Issued	Number of Commercial Permits Issued	Permit Fees Collected by the City
9/22/2009	9/22/2010	23	0	\$15,722
*9/23/2010	9/8/2011	42	0	\$14,372
Number of Addition	onal Permits Issued	+19	0	N/A

^{*}Implementation of Energy Efficiency Incentive Program

As identified in the table above, the number of solar panel permits issued has increased by over 80% (19 new permits). Although there has been an increase in the issuance of permits and a reduction in the permit fees collected by the City, there have been no significant or negative impacts on staff or the department. Moreover, the benefit to the community has resulted in safe, inspected, and approved energy efficient systems that not only provide a cost savings to residential/commercial property owners, but also an environmentally friendly energy alternative.

To continue a cost savings to our residential/commercial property owners, for the installation of energy efficient products and safety, staff recommends the City Council continue this program with the previously approved fees, as follows:

•	Plan check and permit cost for residential 3 kilowatt photovoltaic system	\$320/fix
•	Plan check and permit cost for a commercial 131 kilowatt photovoltaic system	\$540/fix
•	Plan check and permit cost for each window change-out (up 3 windows)	\$20/ea

RECOMMENDATION

Staff respectfully recommends the City Council continue the Energy Efficiency Incentive Program and adopt Resolution No. 11-1645.
