

REPORT TO CITY COUNCIL

DATE: NOVEMBER 13, 2013

TO: HONORABLE MAYOR AND MEMBERS OF THE CITY COUNCIL

FROM: GREG RAMIREZ, CITY MANAGER 

BY: RAMIRO ADEVA, DIRECTOR OF PUBLIC WORKS/CITY ENGINEER 

SUBJECT: CONTRACT AWARD FOR THE STORM DRAIN CONNECTOR PIPE SCREEN AND CATCH BASIN INLET FILTER INSTALLATION PROJECT; NIB 13-03

On May 1, 2008, the Regional Water Quality Control Board adopted a resolution to incorporate a revised Total Maximum Daily Load (TMDL) for trash in the Malibu Creek Watershed. The Trash TMDL is part of a series of strict water quality regulatory requirements designed to protect municipal and domestic water supplies, groundwater recharge, aquatic life habitat, wildlife habitat, and both contact and non-contact water recreation uses in the watershed. As part of those requirements, the TMDL set the numeric limit for trash allowed to be discharged into a water body, shoreline, or channel at zero.

The implementation program for this TMDL recognizes the economic limitations on achieving immediate compliance and allows for a flexible schedule to address trash being conveyed through storm drains (point sources). Furthermore, an agency installing full capture devices in 20% of their catch basins annually for the next five (5) years would be deemed compliant with the trash TMDL.

On November 5, 2013, the City received two (2) sealed bids to install connector pipe screens and catch basin inlet filters in approximately 100 catch basins. The bid results were as follows:

United Storm Water, Inc.	\$121,286.00
J.A. Salazar Construction & Supply Corp.	\$245,706.60

Staff reviewed the bid submittal of the apparent low bidder, United Storm Water Inc., and deemed their bid responsive and acceptable. United Storm Water Inc. previously worked as a subcontractor to Sully Miller Contracting Company on the first phase of the Agoura Road Widening Project. In addition, they have performed similar types of work for local cities and the County of Los Angeles with favorable results. Staff also contacted United Storm Water's references and received positive feedback. The company is based in Industry, California. There are sufficient funds appropriated in the FY 2013/14 budget to cover the cost for United Storm Water's services.

RECOMMENDATION

Staff respectfully recommends the City Council award the contract for the Storm Drain Connector Pipe Screen and Catch Basin Inlet Filter Project; NIB 13-03, to United Storm Water, Inc. in the amount of \$121,286.00.
