

REPORT TO CITY COUNCIL

DATE: DECEMBER 14, 2016

TO: HONORABLE MAYOR AND MEMBERS OF THE CITY COUNCIL

FROM: GREG RAMIREZ, CITY MANAGER 

BY: RAMIRO ADEVA, DIRECTOR OF PUBLIC WORKS/CITY ENGINEER 

SUBJECT: AUTHORIZATION TO SEEK BIDS FOR STORM DRAIN CONNECTOR PIPE SCREENS (CPS) & INLET FILTER INSTALLATION PROJECT; NIB NO. 16-06

On May 1, 2008, the Regional Water Quality Control Board adopted a resolution to incorporate a revised Total Maximum Daily Load (TMDL) for trash in the Malibu Creek Watershed. The Trash TMDL is part of a series of strict water quality regulatory requirements designed to protect municipal and domestic water supplies, groundwater recharge, aquatic life habitat, wildlife habitat, and both contact and non-contact water recreation uses in the watershed. As part of those requirements, the TMDL set the numeric limit for trash allowed to be discharged into a water body, shoreline, or channel at zero.

Staff is requesting authorization to seek bids for the Storm Drain Connector Pipe Screens (CPS) & Inlet Filter Installation Project; NIB No. 16-06. The scope of work consists of retrofitting 131 catch basins throughout the Morrison and Fountainwood neighborhoods with connector pipe screens and filters in order to meet the compliance requirements.

After completion of this project, 100% of the City-owned catch basins draining into Lindero Canyon and Medea Creeks will have been retrofitted with connector pipe screen and filter baskets.

The FY 2016-17 budget includes \$195,000 of Storm Water Capital Project Funds to complete this work. Staff expects to return to Council in January 2017 for the contract award and commence construction shortly thereafter. Construction is anticipated to take approximately thirty-five (35) days, with no work to be done on holidays.

RECOMMENDATION

Staff respectfully recommends the City Council authorize staff to seek bids for the Storm Drain Connector Pipe Screens (CPS) & Inlet Filter Installation Project; NIB No. 16-06.
