i would like to ask that the city council please vote affirmatively to take our city to 100% renewable electricity with the clean power alliance everyone benefits from clean energy and it is vitally important that we take every measure that can to help mitigate the climate crisis the minuscule increase in the cities monthly or yearly electrical bills is so worthwhile in the long run and we should all be doing our best to help do our part please join with the several other local cities that have made the positive forward thinking choice to go with 100% renewable electricity

thank you for your consideration

Subject: Agenda item 9 — let's go 100%

350 Conejo / San Fernando Valley

Dear City Council,

Agoura Hills took a careful initial step into the Clean Power Alliance 3 years ago by choosing the 36% default tier. Since then, we've benefited from cleaner energy, and **all our neighboring cities have followed our example**. And half of them have already chosen 100%. They learned from us; now let us learn from them.

Now, in view of the cascading effects of the climate crisis, it's time for our city to go large for renewable energy. We have this opportunity only once a year.

- Addressing climate change requires action on a large scale. The Clean Power Alliance serves over a million customers. Changing light bulbs is nice, CPA is even nicer.
- Any home or business can opt down from the new tier at any time. But the opt-down rate statewide is very low. Californians are proud and happy to be climate leaders.
- The Clean Power Alliance provides rate reductions for low-income customers as well as a COVID relief program, so no one will suffer economically.

Please vote for 100% on Tuesday.

Gratefully,

Alan Weiner, chapter lead
