I can't believe in today's world that any utility would be so aggressive in violation of an endangered species act. During nesting season right now we have endangered birds nesting. What Edison had done is criminal and environmental damaging.

The City must impose strict restrictions on Edison since they have proven to be liars that only seem to say one thing and do an other.

Thank you for protecting the environment and or wildlife.

Mollie Helfand

Subject: Nesting Birds

Los Angeles Public Works and Southern California Edison sent crews out to prune and cut healthy trees during nesting season. There were Cooper's Hawks nesting and the Bullocks and Hooded Orioles had arrived to begin nesting. There are more birds that were nesting at this time of year. Yet when I called both places they responded with ignorant disrespect and disregard regarding the problem. Public Works said someone was out 10 days ago and didn't see bird nests. What a ridiculous comment. US Fish and Wildlife will confirm that cutting down branches with nests from protected birds is a Federal offense.

In all of the 21 years that I have lived in Liberty Canyon I have never seen such a butcher job launched against the trees that line the east side of Liberty from south of Country Glen to the greenbelt at the south end of the street. No regard whatsoever was given to the nesting birds and squirrels that occupied these trees. In addition to that, trees that have grown through the power lines were left untrimmed and had significant branches lobbed off on the street side, having nothing whatsoever to do with the power lines....I am appalled, frustrated and angry that such irreparable damage has been done to these trees. Holding those who carried out such destruction accountable isn't enough, the damage done cannot be reversed.....if the trees even survive, it isn't likely that they will ever return to their natural beauty. This practice must be stopped now and never allowed to proceed in this manner ever again.....subcontracting to companies that know only that they must cart plant debris away to show that they have completed the hack job they were hired to perform. Angrily Yours, Sherry Ferber, Liberty Canyon resident.

I am shocked by the outrageous actions of Edison's tree trimming program. Since the beginning of nesting season Edison has sent subcontractors out to continue trimming trees. Not only is this against common sense but it is a violation of the endangered species act. You are not allowed to to disturb a nest of an endangered bird. Not only is there no experts on site but there have not been any documents presented that an actual Oology (nesting survey) has been completed by Avian ecology field methods.

The City of Agoura Hills has a duty to make sure Edison is held accountable for theses violations as well as following the guidelines of the endangered species act. The topping of trees in our significant habitat is dangerous. We need to be good stewarts to protect our significant habitat we are living in.

Thank you for taking this very seriously and help save our wildlife.

The pix submitted by Sherry Ferber of Liberty Canyon should make it apparent that these “professionals” know nothing. Any arborist will back that up. So, with their butchering work & their seasonal timing (bird nesting), I quickly suspect contract corruption.

This sham of a “service” will lead to power line damage & fires!
