To Agoura Hills city council,

I plan on attending and participating in today's goal setting workshop meeting. I've attached our preliminary design for the Morrison Park playground project. Our design will change slightly over the next couple of weeks. As you can see our design offers something no other park in Agoura Hills has- handicap accessible ramps onto the play structure. This design provides 100% inclusivity. The wood chip flooring will be replaced with pour and place rubber flooring not seen in these renderings. I have a quote for the purchase of the equipment however this quote will change in the next 1-2 weeks. Morrison Park already has several pathways that lead to the playground area as well as a 22 space parking lot. I believe the parking lot size is sufficient to handle the flow of people visiting the park.

Will the city of Agoura Hills commit funds to this very important parks and rec project?

Will the city give me the go ahead to start the fundraising process knowing that 100% of money raised will go toward the Morrison Park playground? What type of written agreement would the city and I enter into? Does this project need to go in front of a council vote?

A public/private partnership is ideal for this project. Having the city promote this project and assist with fundraising efforts would make this dream a reality. Maybe the city can donate the event center/tables/chairs for a fundraiser. Let's continue this brainstorming session at the goal setting workshop.

Thank you! I look forward to working with you.
