Regarding adding Affordable Housing on 5727 Kanan Road.

This will have a direct negative impact to my family as we are walking distance away.

1. As a resident of Agoura Hills, I need the city to research the safety in exiting the area in case of a fire similiar to the Wolsey fire. The ownership of such information should be on the city since this is about safety.
2. This build will also impact Oak Park residents, have they received notification of these plans?
3. This area is currently impacted by rolling black-outs, will Edison be able to provide such need to the city when it is already struggling? Will our power be shut more often because of these units? Note: when the electric charging stations were placed in that same shopping center, the area experienced more power issues. This need to be researched.

The above 3 questions and situations are answers we are looking to address. These units seems to be something that someone pointed and asked to get built. I would hope there is more 'thinking' before building.

Sincerely,
Dalia Vega
Agoura Hills resident.

My only comment is NO housing in the Kanan Shopping Center!
No one in this neighborhood wants it. It will create a traffic nightmare and make it even more dangerous to evacuate during a wildfire.
STOP pushing this project!

Dominique Simon
Oak Park
