Future Trail Connections
Trail network development continues. Gaps between parks still exist. Park managers and partners continue to seek public access across these gaps. Meanwhile, please stay on the public trails.

The Backbone Trail

The Backbone Trail is the premiere recreational resource of the Santa Monica Mountains National Recreation Area. Over 25 years of hard work and still in the making, 63 miles of the 65-mile trail are now open to the public. Agoura Hills, Calabasas, and Malibu have trails connecting to the Backbone.

Enjoy hiking, horseback riding, mountain biking, wildlife viewing, astronomy, photography, painting. Catch inspiring ridge-line views from Eagle Rock, rest in the shade of Zuma/Trancas Canyons, or find yourself in the Boney Mountain Wilderness.
